

Erratum

A minimum electrophilicity perspective of the HSAB principle

P K Chattaraj* and S Giri

Department of Chemistry, Indian Institute of Technology, Khargpur, Kharagpur-721 302, West Bengal, India

[Indian J Phys. **81** (9), 871-879 (2007)]

As desired by the Authors following changes (on accepted version) be made on their paper referred to as an "Erratum"

The changes are as follows :

<u>Sl. No.</u>	<u>Page Nos. (with location)</u>	<u>Please read as</u>	<u>Instead of</u>
1.	Page no. 871 - line 8 (from bottom)	values	value
2.	Page no. 871 - line 12 (from bottom)	electrons to	electron
3.	Page no. 873 - line 1 (from top at the end)	$((\partial\eta/\partial\gamma)=0))$	$((\partial\mu/\partial\gamma)=0))$
4.	Page no. 873 - line 6 (from top)	[12(d); 16 (b, d)]	[12(d), 16 (b)]
5.	Page no. 874 - Table 2		
	(column 2, line 5 from top)	2.2051	2.2149
	(column 3, line 10 from top)	3.7804	2.2038
	(column 5, line 15 from top)	3.5681	2.043
	(column 7, line 5 from top)	0.4214	0.4312
	(column 7, line 10 from top)	0.2550	1.8316
	(column 7, line 15 from top)	0.3101	1.2150

<i>Sl. No.</i>	<i>Page Nos. (with location)</i>	<i>Please read as</i>	<i>Instead of</i>
6.	Page no. 875 - Table 2 (<i>contd.</i>)		
	(column 2, line 10 from top)	3.7804	2.2038
	(column 2, line 14 from top)	4.8480	4.8156
	(column 2, line 27 from top)	-175.5410	-175.5400
	(column 2, line 29 from top)	3.4263	3.3920
	(column 4, line 13 from top)	5.1563	5.156295
	(column 4, line 14 from top)	4.5258	4.507881
	(column 4, line 15 from top)	2.9373	2.937287
	(column 7, line 10 from top)	-0.0467	1.5299
	(column 7, line 14 from top)	0.7238	0.7382
	(column 7, line 27 from top)	-0.2348	-0.2358
	(column 7, line 29 from top)	2.3212	2.3554
7.	Page no. 876 - Table 5		
	(column 4, line 8 from top)	1060.255	-1060.300
8.	Page no. 877 - Table 6		
	(column 1, foot note)	To be shifted to the bottom of the Table 2	Bottom foot note of Table 6
	(column 4, line 33 from top)	4.9196	5.5318
	(column 7, line 5 from top)	0.0240	0.0200
	(column 7, line 26 from top)	0.0496	0.6618
9.	Page no. 878 - Reference no. [6] at the end	107 PR 46 (2007)	(2007) (in press)

The main conclusion of the paper remains the same.
